Subject: Meeting of Houma Science Support Committee Sat. June 12, 2pm cafeteria re Dispersant UC fact sheet including dispersants

Good afternoon,

If you are in Houma and available, you are invited to another meeting of the Dispersant Science Support Committee to discuss and agree on the type of content and organization of a Unified Command set of Q&As about dispersant use on the Deepwater Horizon incident. We would especially like to talk about how to address public perceptions about health issues associated with dispersant use.

For your advance consideration, attached are the draft Q&As we in the Dispersant Assessment Group have developed with input from NOAA. EPA also has developed some excellent Q&As on their website, and BP IH has some Q&As too. It seems like a good idea for everyone to be able to distribute and use a consolidated set which we can all use under the umbrella of Unified Command.

See you then! Best regards, Ann Hayward

Ann Hayward Walker, Coordinator, Dispersant Assessment Group (DAG)
